### Stage.

- **24ft in width or 8 mts wide.**
- **13 ft or 4.5 mts deep, (narrow part of stage) 18 ft or 6mts in depth (deepest section) the stage has a curved back wall and the depth varies.**

- **We have a collection of stage risers and additions ranging in size from 3.5 ft squared, to 7ft squared. (Rectangle/ square / circle) the height for these is flush with the stage but can be raised to 4ft off the floor.**
- **With the stage additions we can create, for example a perfect fashion / catwalk across the dance floor.**

#### **Venue Access.**

- **Our front double doors, the box office and cloakroom doors can open to drive a car straight on stage.**

#### **Rig.**

- **We have a designed central rig running through the venue roof. This rig is capable of suspending 1.5tons from any part of the rig. We also have four equally spaced trap doors on the dance floor which have four chemical fixed plates which we use for extra rigging security depending on the item or person suspended in the air.**
